

Number Strips Game

Take it in turns to throw the dice.

The number on the dice tells you which number strip you can pick up and place on the table in front of you. e.g. If you throw a three you can pick up a three strip.

As soon as you can, join your number strips to make a 6.
Once you make a six strip put it to one side and start to collect enough strips to make another 6.

The winner is the player who has made the most six strips.

Now write the number sentences for all the 6 strips you have made.

e.g. $6 = 1 + 2 + 3$ or $1 + 2 + 3 = 6$
